-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

1. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

lines 1-3, "wherein the redundant memory element does not replace the first column or the second column if no fails are counted in the first column and the second column" is a negative limitation. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Hughes et al (6,373,758).

As per claims 1-14, Hughes et al disclose a method for repairing defective memory elements in a memory having a plurality of memory elements including a first memory element and a second memory element, the method comprising:

Counting fails in the first memory element with a counter;

Counting fails in the second memory element with the counter;

Allocating a redundant memory element to replace the one of the first memory element and the second memory element having the most fails. (See abstract, 5, col. 9, lines 30-45).

As per claim 15, this claim is rejected under similar rationale as set forth in claim 1.

per claims 16-22, Hughes et al disclose a memory having a plurality of memory elements;

A redundant memory element suitable for replacing at least one of the plurality of memory elements;

A self test circuit that test the memory and allocate the redundant memory element to one of the plurality of memory elements if a defect is found, the self test circuit including a multiplexer that selectively couples memory outputs to a fault counter that counts fails in each one of the plurality of memory elements tested by the self test circuit. (Fig. 5, col. 10, lines 29-48).

As per claim 23-29, these claims are rejected under similar rationale as set forth in claim 16.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung My Chung whose telephone number is 571-272-3818. The examiner can normally be reached on Monday to Friday.
